Adobe Dreamweaver CC Level 2

Duration: *2 Day(s)*

Course Overview

The Adobe Dreamweaver Level 2 course takes students through more advanced features of creating a web site. In this course students will learn how to work with Dreamweaver behaviors, jquery interactive widgets, web animations and video, to create a more interactive and dynamic experience for their web viewers. Learn how to use the Bootstrap framework to make sites responsive and mobile ready. The class will also work in a simulated design team environment to publish, test and edit a live website.
