

Claude Code 101 Foundations

- 1 Hour
- Lecture and Hands-on Labs

Course Overview

This hands-on course introduces participants to the Claude Code desktop app through a fast-paced, scenario-driven format. Participants learn how to open a project, interact with Claude Code, and begin producing useful outputs immediately. By the end of the session, participants will have navigated the Claude Code interface, used slash commands and file mentions to guide Claude's behavior, and created a CLAUDE.md file to manage token usage and shape Claude's responses across a session.

Who Should Attend

- Business analysts, project managers, operations staff, and any knowledge worker beginning to use AI-assisted tools

What You'll Learn

- How to get started with the Claude Code desktop app
- How to use slash commands and file mentions to guide Claude
- How to create a CLAUDE.md to manage token usage and session behavior

Outline

Claude Code: Session 101 - Fundamentals

Track 1 - Zombie Outbreak Emergency Response

- Lecture + Lab: Getting Started with the Claude Code App
- Lecture + Lab: Use Slash Commands, File Mentions, and Skills in Claude Code
- Lecture + Lab: Create a CLAUDE.md, Manage Token Usage, and Generate Your Final Report

Appendix

- Lecture + Lab: Install and Sign In to the Claude Code App

Prerequisites
