

Ansible 205 - Managing Azure Infrastructure with Ansible

- 5 Days
- Lecture and Hands-on Labs

Course Overview

In this course we'll focus on using Ansible to target Microsoft infastructure including Azure and Windows platforms.

Review this course online at https://www.alta3.com/courses/ansible-azure

Who Should Attend

This class is targeted for ...

What You'll Learn

You will learn essential Ansible concepts including:

- Ansible
- Controlling Azure with Ansible
- Controlling Windows with Ansible
- Building run-time environments for Windows platforms
- AI LLM prompt engineering for generating Ansible solutions

Outline

LLM AI Toolkit

• 🖳 Lecture + Lab: Large Language Model toolkit for AI Solution Assistance

Software Control Management

- 🖳 Lecture + Lab: SCM Option #1 GitHub
- 🖳 Lecture + Lab: SCM Option #2 GitLab

Ansible and Azure

- \(\subseteq \text{Lecture} + \text{Lab: Exploring the Ansible Azure Collection} \)
- 🖳 Lecture + Lab: Authenticating Your Local Env to Azure
- 🖳 Lecture + Lab: Installing the Azure CLI with a Playbook
- 🖳 Lecture + Lab: Creating an Azure Virtual Machine
- \(\subseteq \text{Lecture} + \text{Lab: Creating Azure Solutions for Enterprise} \)
- 🖳 Lecture + Lab: Deploy a Windows Machine into Azure
- \(\subseteq \text{Lecture} + \text{Lab: Abstracting Complexity with Roles for Azure} \)
- 🖳 Lecture + Lab: Ansible and Azure Cloudshell
- 🖳 Lecture + Lab: Azure Dynamic Inventory Script
- P Lecture: Tower and Azure Active Directory(AD)
