

# Terraform - Infrastructure as Code

- 3 Days
- Lecture and Hands-on Labs
- Includes all objectives found on HashiCorp's Terraform Associate Certification

#### Course Overview

As enterprises seek to deploy and maintain increasingly complex cloud infrastructure, there is a necessity to use "Infrastructure as Code" (IaC) tools, like Terraform. An open-source, state management tool developed by HashiCorp, Terraform allows developers to use a common coding interface to work through their various clouds safely and efficiently. Attendees will leave being able to write and understand Terraform code (HCL), have a clear understanding of Terraform's various components and supporting tools, as well as when to reach for Terraform over another IaC tool, such as Ansible.

### Who Should Attend

- DevOps Engineers
- Software Developers
- Technical Managers and Leads
- System and Cloud Administrators
- Network Engineers and Developers

## What You'll Learn

- Writing Terraform HCL code
- Deploying into common clouds such as AWS, Azure, Google Cloud, Docker, Oracle, Kubernetes, and VMWare
- Where Terraform fits in the Enterprise CI/CD model
- Differences between Terraform and Ansible
- Best practices
- Prepare for HashiCorp's Terraform Associate Certification
- AI LLM prompt engineering for Terraform snippets and jumpstarting solutions

## Outline

## AI LLM Toolkit

• 🖳 Lecture + Lab: Large Language Model toolkit for AI Solution Assistance

#### Introduction to Terraform

- Ecture: Terraform Course Map
- PLecture: Introduction to Terraform

### Software Control Management

- 🖳 Lecture + Lab: SCM Option #1 GitHub
- 🖳 Lecture + Lab: SCM Option #2 GitLab

### Overview of Terraform

• 🖳 Lecture + Lab: Terraform Install

#### Terraform Modules

- 🗐 Lecture: Terraform HCL Syntax
- 🖳 Lecture + Lab: Up and Running with Terraform
- 🖳 Lecture + Lab: Terraform Variables
- 🖳 Lecture + Lab: Output Values
- \$\Boxed{P}\$ Lecture: Avoid the :latest Tag
- \$\P\$ Challenge: Terraform and Docker

# Beyond Basics

- 🖳 Lecture + Lab: Terraform CLI Workspaces
- 🖳 Lecture + Lab: Terraform Expressions and Errors
- 🖳 Lecture + Lab: Resources replace vs taint
- 🖳 Lecture + Lab: Dynamic Operations with Functions
- \( \subseteq \text{Lecture} + \text{Lab: Creating a Terraform Module} \)
- 🖳 Lecture + Lab: Moving State terraform state mv
- \( \subseteq \text{Lecture} + \text{Lab: Dynamic Provisioning with tfvars Files} \)
- 🖳 Lecture + Lab: Data Sources and HTTP Provider
- P Lecture: Import pre-existing infrastructure
- 🖳 Lecture + Lab: CHALLENGE AWS import

### Loops

- PLecture: for each
- \( \subseteq \text{Lecture} + \text{Lab: Looping Constructs} \text{for each} \)

## Provisioning

- 🖳 Lecture + Lab: local-exec Provisioner
- 🖳 Lecture + Lab: Creating Delays
- 🖳 Lecture + Lab: Terraform templatefile Function

## Terraform Cloud

- 🖳 Lecture + Lab: Terraform Cloud and Terraform Enterprise
- 🖳 Lecture + Lab: Triggering Cloud Builds via Git Commits

## Dynamic Blocks

• 🖳 Lecture + Lab: Dynamic Blocks

### AWS

- 🖳 Lecture + Lab: Terraform and AWS
- 🖳 Lecture + Lab: Output Values and AWS
- \( \subseteq \text{Lecture} + \text{Lab: AWS and looping with count vs for each} \)
- \( \subseteq \text{Lecture} + \text{Lab: Correcting Resource Drift and AWS} \)
- \$\P\$ Challenge: Terraform and AWS

### Azure

• 🖳 Lecture + Lab: Terraform and Azure

## Google Cloud Platform

• 🖳 Lecture + Lab: Terraform and Google Cloud Platform

#### Oracle

•  $\blacksquare$  Lecture + Lab: Terraform and Oracle Cloud Infrastructure

### Terraform and Enterprise

- 🖳 Lecture + Lab: Deploy a Go RESTful API microservice with Terraform
- P Lecture: Terraform vs. Ansible
- 🖳 Lecture + Lab: Terraform and Ansible

#### VMWare

- P Lecture: Terraform and VMWare
- 🖳 Lecture + Lab: Terraform and VMWare

## Helpful DevOps Tools (OPTIONAL)

- 🖳 Lecture + Lab: Open Policy Agents and Terraform
- 🖳 Lecture + Lab: GitHub Actions GitLeaks
- 🖳 Lecture + Lab: GitHub Actions Terraform
- 🗐 Lecture: Terragrunt

# Terraform Review

• 🗐 Lecture: HashiCorp Terraform Study Guide

# Prerequisites

Although not required, students with some experience programming, or pre-existing knowledge of cloud architecture, will most appreciate the technical nature of this hands-on course.

## **Next Courses**

- Jenkins Automation Server Essentials (2 days)
- Ansible Essentials (5 days)
- Go Essentials (5 days)
- Git and GitHub (2 days)
- Git and GitLab (2 days)

## Certification

• Terraform Essentials - Certification Project
